Pyrogel

Safer for pipeline cleaning for pyrophoric contamination

PYROGEL APPLICATIONS:

Cleaning

Treat the Risk You Can't See.

Pyrogel is a linear water-based gel system formulated to address one of the most dangerous forms of pipeline contamination: pyrophoric black powder. By surrounding and reacting with the material, Pyrogel supports safer cleaning operations and simplifies waste handling. It's designed for use in systems that allow liquid-based treatments and offers a visual indicator when treatment is complete.

AVAILABLE PACKAGING:

- **200L drums**
- **1000L IBCs**
- **Offshore tote tanks**

HOW IT WORKS

- Suspends black powder for treatment during flow
- Turns red to show treatment success
- Allows safe recovery and disposal after treatment
- Breaks down for easy disposal of liquid components
- Recommended use with pig for complete removal

WHERE IT WORKS

- Gas pipelines with pyrophoric black powder (Iron Sulphide)
- Systems that permit water-based gel treatments
- Lines requiring visual confirmation of treatment progress
- Jobs where chemical + physical removal is required
