# PYROGEL APPLICATIONS: Cleaning

## Treat the Risk You Can't See.

Pyrogel is a linear water-based gel system formulated to address one of the most dangerous forms of pipeline contamination: pyrophoric black powder. By surrounding and reacting with the material, Pyrogel supports safer cleaning operations and simplifies waste handling. It's designed for use in systems that allow liquid-based treatments and offers a visual indicator when treatment is complete.

# s waste handling. It's • 200L drums

· ZUUL ul ullis

**AVAILABLE** 

**PACKAGING:** 

- 1000L IBCs
- Offshore tote tanks

### **HOW IT WORKS**

- · Suspends black powder for treatment during flow
- Turns red to show treatment success
- · Allows safe recovery and disposal after treatment
- Breaks down for easy disposal of liquid components
- · Recommended use with pig for complete removal

### WHERE IT WORKS

- Gas pipelines with pyrophoric black powder (Iron Sulphide)
- · Systems that permit water-based gel treatments
- · Lines requiring visual confirmation of treatment progress
- · Jobs where chemical + physical removal is required
